

International Workshop on Women and  
Science/Technology Network in Asia

2006.10.01

## Future Vision of the International Workshop on “Women and Science/Technology” Network in Asia

TAKARABE Kae (Chubu University)

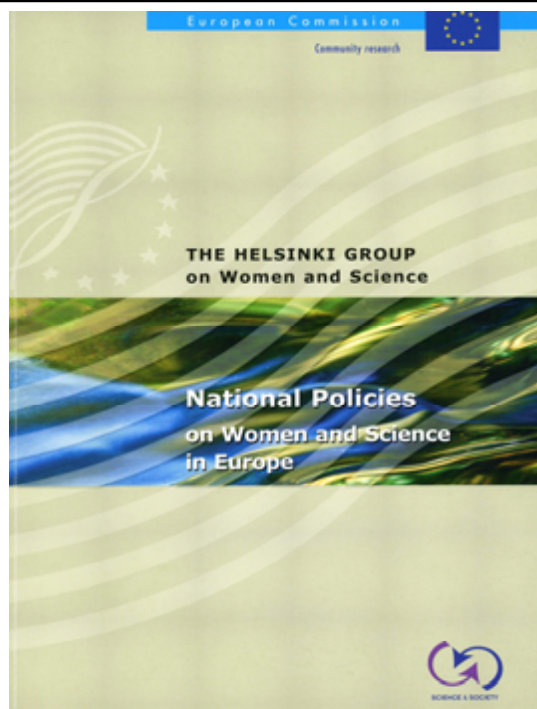

Sex-disaggregated Statistics as  
Gender Mainstreaming Tool

## First, National Statistical Profiles

It is important to exploit sex-disaggregated data which exist at national level to develop the needed gender(ed) indicators,

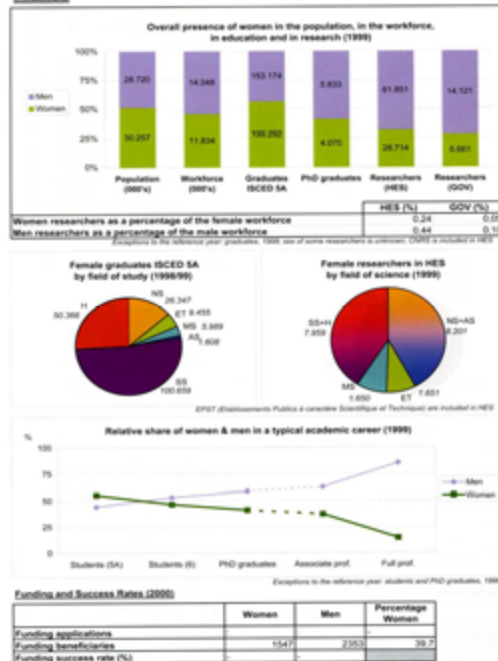

and which at the same time would enable us to take into account the respective national contexts and situations of women scientists.

### EC's Strategy

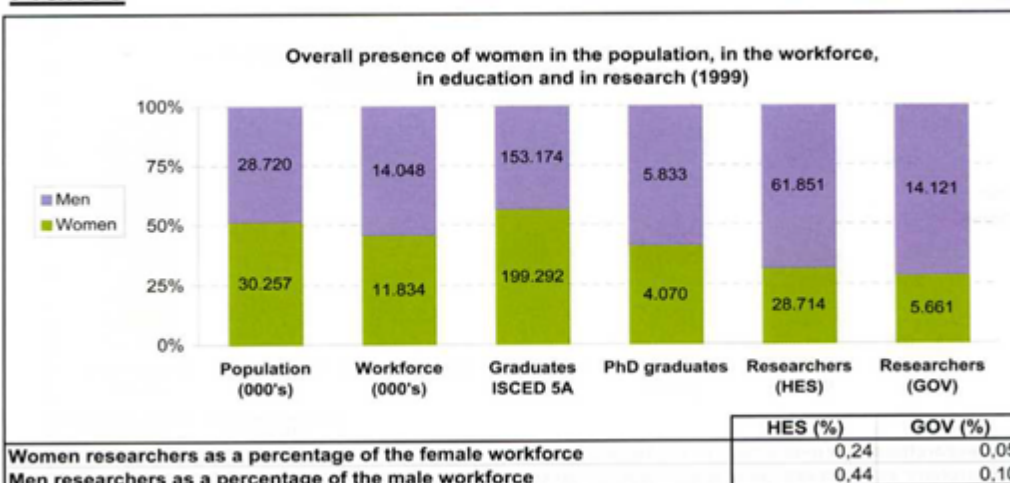

## The Case of France

### France

ISCED5A: bachelor's and master's degrees and master of philosophy  
 ISCED6 : doctoral degree, PhD

#### (4) Funding Table

**Funding and Success Rates (2000)**

	Women	Men	Percentage Women
Funding applications	:	:	-
Funding beneficiaries	1547	2353	39,7
Funding success rate (%)	-	-	

## Secondly, Trans-National Statistical Profiles

It is important to update statistics and make comparative analyses of the old and the new conditions.
